- ✔ AngularJS
- ✔ Bootstrap CSS (v4.0+)
- ✔ Tailwind CSS (v3.0+)
- ✔ Materialize CSS (v1.0)

Professional Summary

With more than 15 years of working within the customer service industry, I am now dedicating my career to be a full-stack web developer. Through guidance from Kansas University, I have established a strong foundation for a seamless experience in front and back-end development; specializing in MERN stack JavaScript, and creating dynamic user interface. With my future employer, I am interested in practicing agile development with DRY code that will enrich natural language and improve communication. Because of my vast customer service background, I am eager to contribute to innovative projects where I can hone in on technical experience while in a collaborative team environment.

Experience
